Dr Radhika Sheorey
East Brunswick Medical Centre

Dear Dr Sheorey,

Re: Mr Daniel Cass
DOB: 24/08/1970 Phone: 0408 468 488
Address: 141B Pigdon Street, CARLTON, VIC, 3053
Email: dan.cass1@gmail.com

Summary

- **Colonoscopy revealing five small, low-grade, benign polyps. (Tubular Adenoma's low grade dysplasia)**
- **Surveillance colonoscopy recommended in four years.**
- **Significant improvement in gastrointestinal and respiratory symptoms on wheat and dairy-free diet.**
- **No action required by you.**

I had the pleasure of reviewing Daniel following his recent colonoscopy. You will be pleased to note that while we removed five polyps, they were all very small and histologically low-grade. They were notably smaller than the polyps removed during his procedure three years ago, which is a reassuring result. I also took several additional biopsies which returned no significant pathology.

We discussed Daniel's recent symptomatic progress. He has been working with an integrative practitioner and has seen a marked improvement in his gastrointestinal symptoms, as well as his asthma and sinus congestion, by reducing his FODMAP intake. While there has been some suggestion that this improvement relates to treated small intestinal bacterial overgrowth (SIBO), I suspect the benefit is more likely due to a reduction in dietary antigens, which may have been triggering a mild allergic or inflammatory response.

Impression and Plan

Daniel is currently in a low-risk category. Given the number of low-grade polyps, he sits on the borderline between a three and five-year surveillance interval. I have therefore recommended a middle-ground approach with a follow-up colonoscopy in four years. I have advised him that as he is under formal surveillance, he does not need to complete the government bowel cancer screening kits.

Regarding his diet, he is currently well-controlled. I have suggested he could gradually reintroduce certain foods to see if his asthma symptoms return, or alternatively, consider a referral to an allergist for formal skin prick or blood testing if he wishes to identify specific triggers. I will see him again in four years' time. I appreciate you referring Daniel back to me.

All appointments and enquires

Suite 201, 100 Victoria Parade
East Melbourne VIC 3002
Ph: 03 9650 7917
Fax: 03 9650 7910
